stabilisers underway**

OVERVIEW

Built by Johnson yachts, JOHNSON BABY is a diverse yacht offering spacious deck areas across various decks for socialising and sunbathing. The increased volume compared to similar sized yachts is due to the wider than normal beam, allowing for generously proportioned staterooms across the whole yacht. Her progressive and distinct exterior lines were designed by Bill Dixon, giving the yacht unique presence and an individual character on the water. JOHNSON BABY accommodates 10 guests in 5 staterooms, of which 4 are double staterooms and one a twin stateroom. The master cabin is located on main deck with a large en-suite bathroom, and guests can profit of the 180-degree panoramic view while waking up to the beautiful scenery of any bay. One double stateroom is located on the upper deck with a queen size bed. The other two double staterooms as well as the one twin stateroom are located on the lower deck. JOHNSON BABY's layout puts strong emphasis on safety, stability and comfort. Being equipped with digital stabilizers and benefitting of the impressive beam, allow dry and comfortable ride at cruising (12kn) or maximum speed (16kn). The safety and comfort on board is also enhanced by the wide laid side deck. These safety and technical features as well as the great selection of water toys make her an ideal charter option for families and friends to adventure some of the most remote locations in Croatia.
